Another Lost Beform.

reform of January lasted until almost the end of February. There will be necessary." But:

"I will be here pest year and the year after, and there will be ne supply bill

Since January 1, 1915, the Governor has "been there," and the antiquated, wasteful, unscientific system he found in operation persists. He knew its evils when he took office: his now discarded proposals were based on that knowledge; he had ample time to prepare for the struggle he knew the correction of abuses would involve. But "they" convinced him of the necessity for perpetuating the practices he condemned, and his master work of construction is postponed over an election.

The Governor may "be there" in 1917 and 1918; but the men who profit by the present system will "be here"; and they will defend that system as competently and as adroitly in the future as they have defended it in the past.

Saving Business From Disaster.

Were it not for the power of the courts to apply laws to business conlitions our affairs would be in chaos. An excellent illustration is furnished by the United States District Court for the dissolution of the American

the corporation was amenable to dis- tre? So it is possible to be patient inline under the statutes. He also under the thought of missing the found that the company has been latest "Harvard Prize Play." a public benefactor. Its competitors as well as its customers desire its Improvement in Medical Education. continuation intact. Therefore, said Judge Rosy, "I am frankly reluctant to destroy so finely adjusted an industrial machine as the record shows the defendant to be."

this litigation terminated in lower court by an unusual process. The Judge refused either to dismiss the Government's bill or to decree the ernment is left in a position to get relief if the corporation does not conduct itself properly. The corporation is left free to go on doing business to the satisfaction of customers and competitors. A law which was ruthless in its purpose is upheld without inflicting economic injury, and the rule of reason is judicially invoked to apply statutory requirements to the needs of modern industry.

Slowly but surely the lines of business legality are being defined in the statutes which the courts have been interpreting ever since Chief Justice application of the Sherman anti-trust ect. And the needs of modern business are conforming themselves to the Now, more than ever, when discussion is shaping itself in anticipation

its several warnings.

lem. The Interstate Commerce Commission some years ago mylted in the preliminary education.

New York subway system, which employs such a device, and a railroad posed to all kinds of severe winter stacles to success.

It is obvious that a stopping device not absolutely fool and weather proof would be a source of new dangers it would undoubtedly cause a relaxation of the human vigilance now required. But it is ridiculous to suppose that the problem involved is insurmountable.

Another "Harvard Play."

Another Harvard play has been given to the world. Boston was, as usual, the city in which it saw the light. The Castle Square Theatre ratory training and theoretical study. there is the cradle of these dramatic pieces that later set out on a career which may or may not astonish the world. It is cheering to read that the newest specimen is unlikely to travel as far as its most recent predeessor. It may enjoy its brief day of popularity in Boston. Less interesting is the exact measure of its popularity so long as it is not brought to vice given to the patient satisfies him. this city. The example of the socalled "Harvard Prize Play" now on Governor WHITMAN has abandoned view in New York ought to be suffihis scheme for the consolidation of cient for a long time. A drama more e appropriation bills. The grand ignoble in conception or victous in influence it is hard to imagine.

But Harvard University must not be a supply bill, because, says the Gov- held responsible for such products as ernor, "they have convinced me it is "Common Clay." They are written by students of certain courses in the university. A jury in which the college is represented only by the professor of the department in which the plays are written selects the best work of the students. A prize for this masterpiece is paid by the manager of a Boston theatre, who puts the piece before the public. Including the specimen now on view in Boston there have been five of them.

Two have been seen in New York. One was a harmless farce. The other was the play still on view. It deiberately glorifles, vice. In the baldest way possible to the stage it presents the spectacle of an abandoned drab who passes through a career of youthful delinquency which brings her into contact with the police. She is subsequently introduced as a great artist. There is no suggestion of the results of her conduct other than the reward that brings her into the most respectable surroundings after she has had enough of the dance hall and the divided attention. police courts.

Of course Harvard University, as well as any other similar institution, to his familiar desk. would repudiate any such contribution to the current drama. It does not crown these plays with prizes, whatever misleading opinions may be decision, just rendered, in the anti- the result of the title they bear into rust suit brought by the Government the world. Editor Josephus's Opportunity.

It must be apparent to Josephus DANIELS that his newspaper requires at this time his immediate and personal supervision. His communications to his managing editor reveal the dissatisfaction its present course has aroused in his mind. The influence of the agent of publicity in which Josephus's genius was exposed until the public service called him has been directed toward objects offensive to his intellectuals and abhorrent to his disposition.

Therefore, Josephus should home. He should relinquish to another the ungrateful duties that now absorb his energies. He should dedicate to the defence of his own personal fortunes those gifts that are unappreciated by Admirals, Captains. Lieutenants and bluelackets. It is unjust to him that he should continue a thankless task, unsupported by public opinion, when his own interests loudly demand his constant and un-

Things have happened

appeal to the President.

Turning back through our history, it is interesting to recall to-day how some of the former statesmen, besides having of childhood and acquire that protective coloring which nature designed sies, also had great refinement, culture young animals to wear. But Mrs. Moland taste, things now almost unknown from lack of education in art

Washington had refinement and ap-preciation for architecture, painting and sculpture. His manner of dress, speech, and his wonderful home at Mount Vernon, showed his rare refinement, not to be equalled by any living American statesman to-day. To Thomas Jefferson belongs even greater distinction, for besides having all that Washington possessed he was a finished architect and draughtsman, having designed his own mansion at Monticello, and planned and laid out the University of Virginia simplicity of architecture.

There now comes along a lapse among the Presidents, until we come to Lincoln, whose Presidential office was taken up with the civil war. I feel sure that had on account of his honesty of mind and his love for the truth would have stood for advancement and the future devel-opment of art in the national capital. Since those bygone days Roosevelt the only man who has been interested the fine arts, and to accomplish something he appointed the commission of 1901 to look out for the art progress of the capital. It is now for Wilson to add another advance to the cause and to show us that in matters of refinement and real understanding of city planning the

Preparedness in the Study.

To the Editor of the Sum-Sir: One of your correspondents a few days ago thought he had discovered a wonderful remedy to draw ink from a fountain per that hesitated to do its duty.

Being interested I tried the blotting paper scheme suggested, thinking it was all right, but "never again," because my good gold pen is now in the repair shop, and I have been advised to shun "quack remedies" hereafter and keep a little sponge.

I have been advised to shun "quack remedies" hereafter and keep a little sponge dampened with some water, in which I can readily dip my pen when it gets clogged or becomes a little dry.
